SMART REMOTE CONTROLLER

All you can control, whatever and wherever

- Easily control 2000 devices
- Patented one-button Hotkey
- RF technology ensures safety

Patented

Special Features

- 1 Adopt RF wireless technology, no need for internet connection. Signals are delivered faster without delay.
- 2 Self-naming system, easy to identify and to control.
- 3 Local On/Off with Hot key control.
- 4 Able to control single, group or all the power switches.

Advantages

- 1 Smart remote controller can integrate up to 2000 electrical equipments / circuits.
- 2 Three-stage adjustable dimming control functions for lighting or fan.
- 3 Patented design: one key turn on/off nearside devices.
- 4 RF signal has no direction issue and the control distance is up to 150M.
- 5 The smart remote controller is compatible with all the EZCon series products. No upgrade fees.
- 6 No overheat problem, maintenance free.
- 7 Private network provides high security when using the EZCon products.

Applications

All kind of lighting, fan, power strip, adapter socket, in wall socket, roll-up door, electric curtain, and electronic lock.

POWER STRIP

Easy power saving for home

- Group control and individual control
- Control range up to 150 meters
- Current overload protection

Need to use with "smart remote controller"

Special Features

- 1 Remotely turn on/off the power strip.
- 2 Each outlet can be named which makes corresponding electrical appliance easier to manage.
- 3 Controlled distance up to 150M by using EZCon smart remote controller.

Advantages

- 1 Extend the life span by less unplugging the electric appliance.
- 2 Press the "OFF"key on the smart remote controller to turn off the power strip. Convenient and safe.
- 3 Outlet can be controlled individually or partially or all together.
- 4 Each outlet has its own LED indicator to provide over current protection.
- 5 Meet ROHS certification standard with no harmful materials are used.

Applications

Any kind of lighting fixtures

POWER SWITCH

One button manage all lamps

- Easy installation
- Three-stage dimming
- Current overload protection

Need to use with "smart remote controller"

Special Features

- 1 Simple installation without complicated wiring. Setup can be easily modified anytime.
- 2 Power switch can be connected to any kind of lighting fixtures. No name brand required.
- 3 Control distance up to 150M by using our EZCon smart remote controller.

Advantages

- 1 Convenient to use. No need to turn the device on/off using traditional power switch.
- 2 Easy installation and can modify setup anytime without re-wiring. Save cost for drill holes > make up the wall or paint the wall.
- 3 Lighting devices can be controlled singly or by group.
- 4 Three-stage adjustable dimming scene feature provides flexible and more comfortable environment.
- 5 Offer better security through over current protection.

Applications

Any kind of lighting fixtures

AC/DC ROLL-UP DOOR ELECTRONIC CURTAIN CONTROLLER

Provide office and home convenience

- No need for secondary construction
- Prevent password leakage
- Control range 150 meters

Need to use with "smart remote controller"

Special Features

- Compatible with all the existing motor. No name brand required. Easy to install.
- Replace traditional controller and directly remote control corresponding roll-up door or electric curtain.
- Original remote controller still can be reserved.
- Only re-coding is needed if the EZCon smart remote controller is lost.

Advantages

- Directly connect to existing motor without affecting original structure.
- Self-naming system, easy to remember and to control corresponding roll-up door or electric curtain.
- Patented design and unique encryption system which can issue 2000 set of keys to prevent illegal side copy.
- One EZCon smart remote controller can integrate up to 2000 devices saving the trouble of carrying multiple controllers.

Applications

Roll-up door \ Electric curtain

ELECTRONIC DOOR LOCK CONTROLLER

Home and business security goalkeeper

- Prevent password leakage
- Control range 150 meters
- Remote authorized patent

Need to use with "smart remote controller"

Special Features

- No name brand door lock required for easy installation.
- Patented design and unique encryption system provide high security.
- Easy to remember with self-naming system. No need for actual door keys.
- Remote control distance up to 10M using EZCon smart remote controller.

Advantages

- Only recoding is needed if the EZCon smart remote controller is lost. No need to change the whole set of door key control unit.
- Self-naming with 500 ~ 2000 sets of rolling code key to provide convenience and high security.
- Exclusive patented remote authorization method provides adding or deleting access right anytime. Convenient \ cost saving and more safe.

Applications

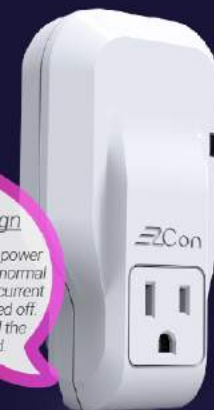

Home \ Office \ Hotel

ADAPTER PLUG

Extend the life of the appliance

- Three-stage dimming
- Control range 150 meters
- Current overload protection

Need to use with "smart remote controller"

Thoughtful design

LED indicator shows power usage status which blue is normal while blinking red is over current and the power will be turned off. Provide the users with all the protection they need.

Special Features

- Just plug into the wall outlet and then enjoy the convenience of remotely control power switch.
- Corresponding electrical appliance can be named which make it easier to manage.
- Adapter plug has high mobility. Controlled distance up to 150M by using EZCon smart remote controller.
- Over current protection feature provides better security.

Advantages

- Remotely turn on/off the power of adapter plug by using EZCon smart remote controller. More convenient to use and save power when electric appliances are truly turned off.
- Avoid frequently unplug power cord and extend the life span of electrical appliance. Adapter plug is easy to carry and can control corresponding electrical appliance anytime and anywhere. Provide more safety by preventing children from touching the socket.

Applications

All kind of electric appliances

IN WALL DUAL OUTLET SOCKET

Energy saving and safer

- Group control and individual control
- Easily cut off the power
- Current overload protection

Need to use with "smart remote controller"

Thoughtful design

LED indicator shows power usage status which blue is normal while blinking effect is over current and the power will be turned off. Provide the users with all the protection they need.

Special Features

- More convenient to use. No need to unplug power cord every time.
- Each outlet can be named which makes corresponding electrical appliance easier to manage.
- Over current protection feature offers better security.

Advantages

- Traditional appliances are upgraded and turned smart when using EZCon smart in wall socket.
- Remotely turn on/off the power of in wall socket by using EZCon smart remote controller. More convenient to use and save power when electric devices are truly turned off.
- Avoid frequently unplug power cord and extend the life span of electrical appliance.
- Use V0 level high quality fire prevention material to assure safety and reliability.
- LED indicator shows blue under normal condition and will turn blinking red if over current occurs. The power will be cut off if that is the case.

Applications

All kind of electric appliances
